Date of Admission	08-Jan-2025	Time of Admission	13:15
Date of Discharge	13-Jan-2025	Time of Discharge	12:30
Length of Stay	5 Days	Admission Type	Planned
Department	Cardiology	Treating Doctor	Dr. Suresh Reddy
Qualification	MBBS, MD, DM (Cardiology)	Reg. No.	KMC/45231/2018

Clinical Details

Chief Complaint:	Patient presented with chest pain, breathlessness, and diaphoresis since 4 hours
Final Diagnosis:	Acute ST-Elevation Myocardial Infarction (STEMI) (ICD-10: I21.0)
Procedure Performed:	Percutaneous Transluminal Coronary Angioplasty (PTCA) with DES Stent
Implant Used:	DES Coronary Stent 3.0x28mm (Xience Sierra, Abbott)
Anaesthesia Given by:	Dr. Priya Sharma, MBBS, MD (Anaesthesia)

History of Present Illness:

Rajesh Kumar Sharma, a 58-year-old male with known hypertension and type 2 diabetes, presented to casualty with acute onset chest pain radiating to left arm, associated with diaphoresis and breathlessness. ECG showed ST elevation in leads V1-V4. Troponin I was significantly elevated at 12.4 ng/mL. Patient was immediately taken for emergency coronary angiography.

Investigations at Admission:

ECG: ST elevation V1-V4. Troponin I: 12.4 ng/mL (elevated). 2D Echo: EF 35%, anterior wall hypokinesia. Coronary angiography: LAD 95% stenosis, LCX 40% stenosis.

Treatment Given:

Emergency PTCA performed. DES stent (3.0x28mm, Xience Sierra, Abbott) deployed in LAD. Aspirin, Clopidogrel, Atorvastatin, Ramipril, Metoprolol started. Post-procedure ECG: ST resolution. Patient shifted to CCU.

Condition at Discharge:

Patient discharged in stable condition. Vitals stable. Wound healthy. Advised rest and follow-up.

Discharge Medications:

Tab Aspirin 75mg OD, Tab Clopidogrel 75mg OD, Tab Atorvastatin 40mg HS, Tab Ramipril 5mg OD, Tab Metoprolol 25mg BD, Tab Pantoprazole 40mg OD for 30 days.

Follow-up Instructions:
